

Power Meter Monitor

Model: PMM0720

Document version: 1.1

Date: August 2021

Digital output 50VDC module

KEY FEATURES

- Digital outputs 50VDC
- 5000V system/field isolation
- Very compact size
- DIN rail mounting
- IP54 protection degree
- Operating temperature: -20°C to +83°C

DESCRIPTION

PMM0720 is a 50VDC digital output module which transmits control signals from the CPU to the connected actuators.

PMM0720 has a LED which indicates the current status of the connected device for diagnostics purposes.

TECHNICAL DATA

Number of digital outputs	1
Signal type	Voltage
Voltage signal type	50VDC
output characteristic	High-Side switching
Input current	1mA
Isolation	5000V system/field
Indicators	1x Green LED
Operating temperature	-20°C to +83°C
Degree of protection	IP54

MECHANICAL DATA

Width	66.5mm (2.6")
Height	113mm (4.5")
Depth	6mm (0.23")
Wight	50 g
Mounting type	Din rail

BLOCK DIAGRAM

NUMBER	SIDE	DESCRIPTION
1	CPU	INPUT 1
2	CPU	VCC 3.3-5 VDC
3	FIELD	VCC up to 50 VDC
4	FIELD	Digital Output
5	FIELD	Common
