

Power Meter Monitor

Model: PMM0723

Document version: 1.1

Date: February 2021

Relay output 250VAC 6A module

DESCRIPTION

PMM0723 is a two channel relay output (250VAC/6A) module which transmits control signals from the CPU to the connected actuators.

PMM0723 has the ability to deliver 6A to the connected load which makes it highly useful and applicable in a wide range of industrial practices

TECHNICAL DATA

Number of contacts	2
Signal type	Voltage
Voltage signal type	250VAC
Output circuit design	changeover contacts Relays
Output characteristic	Potential-free
Output current per channel	6A
Switching frequency	0.1HZ
Isolation	5000V system/field
Operating temperature	-20°C to +83°C
Degree of protection	IP54

MECHANICAL DATA

Width	55mm (2.16")
Height	82.3mm (3.2")
Depth	6.2mm (0.24")
Wight	50 g
Mounting type	Din rail

KEY FEATURES

- 2 Channel outputs 250VAC 6A
- 5000V system/field isolation
- Very compact size 55 X 82 mm
- DIN rail mounting
- IP54 protection degree
- Operating temperature: -20°C to +83°C
